

Spark Scholar **Spotlight**

Reyonna

11th Grade

“I love how it’s not time-based and I can work on SparkNC at anytime.”

Current Work

Artificial Intelligence

Computer Systems Engineering

Exploring Tech Fields

Design UX/UI

Rowan-Salisbury Schools

Reyonna, currently in the 11th grade, embarked on her SparkNC journey during the summer of 2023 as a participant in the **Tech Creatives Summit**. This experience ignited her passion for **Artificial Intelligence**.

She fostered that interest through SparkNC by choosing and completing the *Teaching Computers: Fundamentals of AI/ML* Unit. She then **branched into other high-tech fields**, choosing Units like *Code Art with Meaning*, *Hooked on Design*, and *Makey Makerspace* that helped her explore design, coding, and computer systems.

Operating on a **flexible schedule within the SparkNC program**, Reyonna frequents the SparkLab during her free time, as part of her internship, and after completing her other classwork. She wants to pursue a career in tech-integrated law, and her SparkNC experience is helping her develop insights into the ethical, legal, and technical issues in high-tech fields.
